

STUDENT GAME PLAN!

The will to win is not as important as the will to
PREPARE TO WIN

GAME PLAN!

PROJECT
LEARN
OF SUMMIT COUNTY

DUG OUT

The will to win is not as important as the will to Prepare To Win!

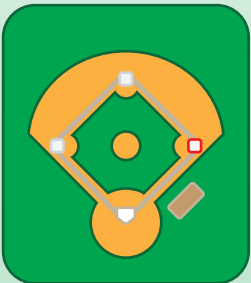

The first step toward your future is registering for classes. Sometimes taking that first step is the hardest part. Now that you have made it here, the Project Learn team is here to support your educational journey. You will work directly with Orientation staff, your Student Coach, and of course, your instructor.

AT BAT TO FIRST

Some want it to happen. Some wish it to happen. Others make it happen.

In Orientation, you will complete any required paperwork and check your knowledge in Reading and Math. This "Knowledge Check" will be used to determine next steps. For most students, six weeks of classes with dedication to attendance and participation is the right move forward. Your Orientation facilitator and Student Coach are prepared to help you determine your educational goal and the best way to get there. At the end of the six weeks, you will check your knowledge again to see where you have made educational gains, and to identify where there is still room for improvement.

FIRST BASE

Opportunity may knock, but you must open the door.

You have made it "on base"! You will join class at the start of the Welcome Week. During this first week, you will continue to develop learning goals and get familiar with the classroom, classmates, and instructor.

RUN TO SECOND

All things are difficult before they are easy

You have made it "on base" and now the real work begins. Attendance and participation are the keys to success. Keep your head in the game and attend every class to get the most out of your efforts. Project Learn strictly enforces a 75% attendance policy. We are here for those that are in it to win it. We also know that life can throw a curve ball. If you have to miss class or have to take a long term break, always communicate with your instructor and/or Student Coach to discuss your options. Don't just stop!

SECOND BASE

It isn't just the hours you put in, but what you put in the hours.

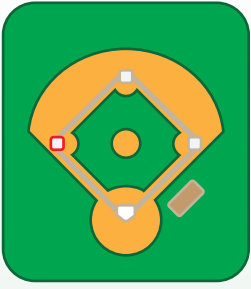

Forty hours of attendance is a real milestone. They say it takes doing something twenty-one times to make it a habit. By this point you have attended almost that many classes and hopefully you have established a positive learning routine. You are half-way to home base. It's time to see how you are progressing.

RUN TO THIRD

We don't lose. We WIN or LEARN, or BOTH

Are you curious to see if your hard work is paying off? It's time for your next "Knowledge Check". Try your best on your "Knowledge Check" so you can identify areas of growth and areas for improvement. Your outcomes will determine your next move.

THIRD BASE

Every strike brings you closer to the next home run.

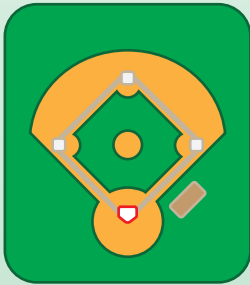

Now that you have two "Knowledge Checks", one from Orientation and one after forty hours of class participation, you are able to measure your gains. You will look closely at your outcomes to identify areas of growth and areas that still need improvement. Your "Knowledge Check" may indicate that you are ready for an Official Practice Test, or specialty course. If that is the case, the Student Engagement Coordinator and/or the ESOL Coordinator will work with you to determine what supplemental services will be a good fit. If you don't see the gains you expected on your "Knowledge Check", you will work with your instructor and/or your Student Coach to identify ways to make your classtime and study habits more effective.

RUN HOME

*Do the best you can until you know better.
Then when you know better, do better.*

This is the final stretch, and you are so close to a home run! It's just a matter of keeping your momentum and implementing any new strategies you discovered. You are so close to your original goal, it's natural to start thinking about what you want to accomplish next.

HOME RUN

*Winning does not mean always being first. It means
you are doing better than you've ever done before.*

YOU DID IT! You accomplished your educational goal. Make sure to celebrate your accomplishment. Maybe that is attending a Graduation Ceremony or Celebration of Learning with Project Learn. You should be extremely proud of yourself. What goal are you going to conquer next and how can Project Learn help?

Whatever your next goal is, we are here to help you reach it. This feels like the end, but it is just the beginning. If you aren't sure what you want to do next, that is okay too. Maybe you just want to go to bat for others and motivate them to make education a priority.
